DISTRACTION BURGLARIES

Police are issuing a warning about 'distraction burglaries' during the summer months. Teams of criminals who use the technique of keeping someone talking while another of the group slips into the house and searches for money are always more active in the summer. Sometimes they pose as bogus officials, but on other occasions they will just begin a conversation with someone who may be in the garden. Friends and relatives of elderly and vulnerable people should keep an eye open for them, and report anyone behaving suspiciously.
